

CHEMTEST™

Easy test, easy life.

Animal Health Catalogue

CHEMTEST develops high-precision tests for the diagnosis of bacterial infections that have great impact on animal health.

With a team of scientists with over 20 years of experience, at Chemtest we develop innovative solutions to detect infectious diseases in a simple and accurate way, contributing to improve health and quality of life in our society.

Applying our technological platforms, we develop tests that are easy to use, fast, and highly reliable.

Highest precision in direct-detection diagnostics

GenCap

Our products based on isothermal amplification followed by lateral flow detection incorporate our exclusive GenCap technology, that detects nucleic acids maximizing sensitivity and specificity.

Maximum accuracy in serological diagnosis

GlycoEng

Using our innovative technology platform GlycoEng, we design recombinant glycoproteins to create diagnostic tests with maximum sensitivity and specificity. Applying this exclusive technology, Chemtest produces highly accurate tests for diagnosing bacterial infections.

Maximum accuracy in capture diagnosis

NanoCap

Our capture ELISA kits incorporate the innovative platform NanoCap, based on the use of nanobodies to make diagnostic tests with maximum sensitivity and specificity, reducing the usual interferences in this type of testing. With this technology Chemtest produces highly accurate capture ELISA kits.

Superior diagnostic performance

Pure-R

Using our exclusive purification system Pure-R, Chemtest produces highly purified homogenous antigens that are used to develop tests with a superior diagnostic performance, minimizing cross-reactivity, and providing highly accurate results.

We care for the environment

Green test

At Chemtest we use innocuous, biodegradable, and recyclable materials.

Product	Presentation	Ref. number	
 VETLIS® Brucella Glyco-iELISA Bovine animals (serum and milk) Indirect ELISA kit for the detection of anti-Brucella antibodies in bovine serum and milk samples.	Kit. 2 plates (192 determinations)	15-VL01-2P	
	Kit. 5 plates (480 determinations)	15-VL01-5P	
 VETLIS® Brucella Glyco-iELISA Porcine animals (serum) Indirect ELISA kit for the detection of anti-Brucella suis antibodies in porcine serum samples.	Kit. 2 plates (192 determinations)	15-VL02-2P	
	Kit. 5 plates (480 determinations)	15-VL02-5P	
 VETLIS® Brucella Glyco-iELISA Caprine animals (serum) Indirect ELISA kit for the detection of anti-Brucella melitensis antibodies in caprine serum samples.	Kit. 2 plates (192 determinations)	15-VL05-2P	
	Kit. 5 plates (480 determinations)	15-VL05-5P	
 VETLIS® Brucella Glyco-iELISA Ovine animals (serum) Indirect ELISA kit for the detection of anti-Brucella ovis antibodies in ovine serum samples.	Kit. 2 plates (192 determinations)	15-VL04-2P	
	Kit. 5 plates (480 determinations)	15-VL04-5P	
 VETLIS® Brucella Glyco-iELISA Canine animals (serum) Indirect ELISA kit for the detection of anti-Brucella canis antibodies in canine serum samples.	Kit. 2 plates (192 determinations)	15-VL03-2P	
	Kit. 5 plates (480 determinations)	15-VL03-5P	
 VETSTRIP® Brucella Bovine animals - Card Test (serum, plasma, whole blood and milk) One step immunochromatographic test for the detection of anti-Brucella antibodies in bovine serum, plasma, whole blood and milk.	Kit. 10 determinations	15-VSC01-10C	
	Kit. 20 determinations	15-VSC01-20C	
 VETSTRIP® Brucella Caninos - Card test (serum, plasma and whole blood) One step immunochromatographic test for the detection of anti-Brucella canis antibodies in canine serum, plasma and whole blood.	Kit. 10 determinations	15-VSC03-10C	
	Kit. 20 determinations	15-VSC03-20C
